QTips: Quiz Tips for Quiz 2 11am

The following are reminders of what you will/won’t need for your quizzes.

1) You’ll be given trig substitutions on your exam. You won’t have any integration by parts, and you won’t need recursions. You’ll need to know derivatives and integrals of tan, sec, sine, cos.

2) This quiz tests whether you’ve learned trig substitutions. If you don’t use a trig sub, you don’t get any credit.

3) You’re asked to show work, not just answers. In class, I overdo the work on purpose. You don’t have to overdo it like me, but you still have to show some relevant work.

That’s pretty much it ...
