

First-Day Information Sheet

Technicalities

Lectures: MWF 1:00-2:00pm in PMA/RLM 5.104

Office Hours: Mon/Fri 11:00-11:50am and Wed 10:00am-10:50am in PMA (RLM) 13.142

My e-mail: mcudina@math.utexas.edu

Phone numbers: (512)232-6186 (the instructor's office)
(512)471-7711 (Department of Mathematics - main office)

REQUIRED text: "Mathematical Interest Theory (2nd Ed)" by James W. Daniel and Leslie Jane Federer Vaaler
There is a solutions manual that goes along with this text. It is not required, but there has been positive feedback from former students.

URL: <https://web.ma.utexas.edu/users/mcudina/interest-theory.html>

About the Course

A few (serious) introductory remarks

- ◇ *Course description.* This course is intended to cover the material on the joint SoA/CAS Exam FM/2. It contains classical interest theory and some basic topics from finance. For more details, see the departmental syllabus available at <https://web.ma.utexas.edu/users/mcudina/m329f-dept-syllabus.pdf>
- ◇ *Learning objectives.* For more details, see the departmental syllabus available at <https://web.ma.utexas.edu/users/mcudina/m329f-dept-syllabus.pdf>
- ◇ *Prerequisites.* Grade of at least C in M408L or M408D.
- ◇ *Drop dates.* The last drop date for this class is the one announced on the academic calendar of the University of Texas at Austin, i.e., April 6th, 2020. For the full academic calendar, see <http://registrar.utexas.edu/calendars/>

A few words about the assignments and grading

***Homework.* This is important information: I will not accept homework that does not conform to the guidelines that follow!**

Homework will be assigned in class and/or available on the course website. The homework will **not** be posted on *Canvas*. You will hand in your homework via online submission of **typed-up** solutions through Canvas. Your solutions need to be in order and you should number the pages.

The lowest two homework scores will be dropped. The homework assignments and the due dates will be announced as the term progresses.

Having read and understood this *First-Day Handout* in its entirety will count as one homework assignment. To get the credit, read this entire document with understanding. Then complete the final page of this document and return that page to your instructor by **February 5th, 2020**. Not handing in this assignment does **not** exempt you from abiding by the First-Day Handout.

Quizzes. You should **not** expect to have quizzes and in-class assignments to be completed and handed in during our class meetings. Instead, you will have various warm-up and review worksheets to complete at home. They will all be gathered under the category of *Quizzes* when the final scores are calculated. Please, be vigilant in class to learn about how your quizzes are supposed to be submitted and when they are due! You will hand in your quizzes via online submission of **typed-up** solutions through Canvas. Again, your solutions need to be in order and you should number the pages.

The lowest two quiz scores will be dropped. The homework assignments and the due dates will be announced as the term progresses.

In-Term Exams. These exams will be administered during regular lecture time and will take place in the same classroom. Each exam will focus mostly on the material covered since the previous exam, but - due to the cumulative nature of the course material - it is quite possible that some of the problems will refer to earlier material. Anybody whose average score in **all three in-term** exams is above 90 will get an automatic A and will not be required to take the final exam. To clarify the last point: If you want to be exempt from the final exam, you **must** take all three in-term exams, and the average score of **all three** of them must be above 90%. To prepare for the exams, you will be given access to sample problems and past exams. These are meant to introduce you to the format of the actual exam and the material covered therein - not the exact content of the real exam.

The Final Exam. The final exam is going to be comprehensive. That means that any material covered in class or assigned as reading can (and probably will) appear. The date and time of the final is: **Saturday, May 16 (2:00pm-5:00pm)**.

For more information on the **uniform** UT final-examination policy, please consult

<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/examinations/>

These are the things you *should* bring to the exams:

- i. a sufficient amount of paper to work on and hand-in your solutions on;
- ii. calculators of any kind - the following are allowed at CAS/SoA exams: Texas Instruments BA-35 or BA II Plus or TI-30X or TI-30Xa or TI-30X II.

These are the things you *must not* bring to the exams:

- i. books, notes, manuals, anything containing solved problems;

Your scores during the semester will be incorporated into your final grade according to the following scheme:

Homework (total with two lowest scores dropped): 10%

Quizzes (total with two lowest scores dropped): 10%

In-term exams (total): 50%

Final: 30%

In the end, let me caution you that

- **no late homework will be accepted** and
- there will be **no make-up in-term exams**. If you provide me with a written proof that your absence was “legitimate” (e.g., a note from your doctor or your lawyer), you can expect **one and ONLY one** in-term grade dropped and your in-term average calculated based on the remaining two scores. If you miss an in-term exam, you are immediately out of contention for the automatic A based on the in-term average.

Plus/minus grades will not be assigned to undergraduate students. The final letter grades will be assigned relative to your numerical score obtained from the above scheme in the following way

A : 90 – 100

B : 80 – 90

C : 65 – 80

D : 55 – 65

I do not “curve” the grades!!!!

A few bits of friendly advice

- ◇ *Take your homework assignments seriously* - This course is not very sophisticated mathematically, but the computations will get very elaborate very soon. The only way to deal with that is for you to work individually and continuously.
- ◇ *Discuss the course with your colleagues* - This advice is closely connected to the one above. In order to be able to participate in class, you first need to build up a vocabulary - and there will be a lot of new vocabulary in the beginning. Who better to practice the new concepts with than your classmates who are in the same situation? I suggest that you try to work on homework assignments in pairs and small groups. Of course, you will be required to write-up your own final version (and I urge you to do so - that is the only way you will be able to tell what your individual knowledge is, as opposed to the collective knowledge of your study-group).

- ◇ *Don't try to cheat* - This is an unpleasant topic, but unfortunately a necessary one! One is often tempted to stretch the boundaries of mere discussion/collaboration with a fellow student into the territory of pure and simple cheating. In short, everything that you present as your own work (especially the work that is supposed to be graded!) should, in fact, be your own work, and not something copied from an external source. In case that a student is caught in violation of the principles of academic honesty enforced at this university, he/she is immediately reported to the higher authorities and assigned a failing grade in this course. You are expected to have read and understood the current issue of General Information Catalog, published by the Registrars Office, for information about procedures and about what constitutes scholastic dishonesty. Please visit http://deanofstudents.utexas.edu/sjs/acint_student.php
- ◇ *Get familiar with the required text* - This is advice that everybody gives, but nobody takes - do try to take a peak into the material we are going to cover in advance. It will make your journey less stressful, and will save you time and energy in the long run.
- ◇ *Have realistic impressions of your performance* - The grading scheme for this course is described above and I do not intend to stray from it. You are solely responsible for keeping a tally of your scores throughout the semester and entering your results in the grading formula above to avoid any surprises at the end of the semester.
- ◇ *On email and office hours* - Email should be used for brief messages about the organization of and current goings on in the course. As a rule, you should first consult the first-day handout to see if your question is answered here. If there is still any ambiguity, contact the instructor. Your instructor is handling a great number of email messages. You should not expect to have your particular email answered in less than 48 hours. You should not be asking mathematical questions via email, since they are incredibly difficult to answer through a typed message. To get an answer to this type of questions, you should come to office hours and ask in person. When coming to office hours, you should be able to present the mathematical question you have, the route(s) you took in attempting to solve the problem and the obstacles you encountered.

◇ *UT mandated notes*

“Counselling and Mental Health Center Student Services Bldg (SSB), 5th Floor Hours:
M–F 8am–5pm

Phone: 512 471 3515

<http://www.cmhc.utexas.edu>”

“The University of Austin provides upon request appropriate academic accommodations for qualified students with disabilities. For more information, contact the Office of the Dean of Students at 471- 6259, 471-6441 TTY or or <http://diversity.utexas.edu/disability/>.”

“Religious holy days sometimes conflict with class and examination schedules. Sections 51.911 and 51.925 of the Texas Education Code relate to absences by students and instructors for observance of religious holy days.

Section 51.911 states that a student who misses an examination, work assignment, or other project due to the observance of a religious holy day must be given an opportunity to complete the work missed within a reasonable time after the absence, provided that he or she has properly notified each instructor.

It is the policy of The University of Texas at Austin that the student must notify each instructor at least fourteen days prior to the classes scheduled on dates he or she will be absent to observe a religious holy day. For religious holidays that fall within the first two weeks of the semester, the notice should be given on the first day of the semester. The student may not be penalized for these excused absences but the instructor may appropriately respond if the student fails to complete satisfactorily the missed assignment or examination within a reasonable time after the excused absence.”

“This course carries the Quantitative Reasoning flag. Quantitative Reasoning courses are designed to equip you with skills that are necessary for understanding the types of quantitative arguments you will regularly encounter in your adult and professional life. You should therefore expect a substantial portion of your grade to come from your use of quantitative skills to analyze real-world problems.”

“ Recommendations regarding emergency evacuation from the Office of Campus Safety and Security, 512-471-5767, <http://www.utexas.edu/safety/>:

- Occupants of buildings on The University of Texas at Austin campus are required to evacuate buildings when a fire alarm is activated. Alarm activation or announcement requires exiting and assembling outside.
- Familiarize yourself with all exit doors of each classroom and building you may occupy. Remember that the nearest exit door may not be the one you used when entering the building.
- Link to information regarding emergency evacuation routes and emergency procedures can be found at: <http://www.utexas.edu/emergency/>
- Students requiring assistance in evacuation shall inform their instructor in writing during the first week of class.

- In the event of an evacuation, follow the instruction of faculty or class instructors.
- Do not re-enter a building unless given instructions by the following: Austin Fire Department, The University of Texas at Austin Police Department, or Fire Prevention Services office.
- Behavior Concerns Advice Line (BCAL): 512-232-5050”

This syllabus is subject to modification. Any changes will be announced in class.

A tentative schedule

WEEK 1	Jan 22nd Jan 24th	Orientation. Sections 1.2-4, 1.7-8.	
WEEK 2	Jan 27th Jan 29th Jan 31st	Sections 1.6, 1.5, 1.9. Net present value. Sections 1.10-11 Section 1.12	- -
WEEK 3	Feb 3rd Feb 5th Feb 7th	Inflation. Sections 2.2, 2.3 Sections 2.2-3 (cont'd), 2.4. Sections 2.5	- -
WEEK 4	Feb 10th Feb 12th Feb 14th	Section 2.6 Section 2.7 In-Term Exam I	- -
WEEK 5	Feb 17th Feb 19th Feb 21st	Section 3.2 Sections 3.3, 3.11 Section 3.5	-
WEEK 6	Feb 24th Feb 26th Feb 28th	Sections 3.6, 3.4 Sections 3.7 Sections 3.8	-
WEEK 7	Mar 2nd Mar 4th Mar 6th	3.9 3.10 3.10 (cont'd)	-
WEEK 8	Mar 9th Mar 11th Mar 13th	3.12-13 Sections 4.2, 4.3 Section 4.6	-
WEEK 9	Mar 23rd Mar 25th Mar 27th	Section 5.2 Section 5.3 Section 5.4	-
WEEK 10	Mar 30th Apr 1st Apr 3rd	Problem Solving Session In-Term Exam II Section 6.2	-
WEEK 11	Apr 6th Apr 8th Apr 10th	Section 6.3 Section 6.4 Section 6.5	- -
WEEK 12	Apr 13th Apr 15th Apr 17th	Section 6.9 The dividend discount model. On arbitrage.	- -
WEEK 13	Apr 20th Apr 22nd Apr 24th	Section 8.3 Swaps on interest rates. Section 9.2	- -
WEEK 14	Apr 27th Apr, 29th May 1st	Section 9.3 Section 9.4 Problem solving session.	- -
WEEK 15	May 4th May 6th May 8th	In-Term Exam III On selling short. Problem Solving Session.	- -

I have read and understood
the First-Day Handout
for M329F(unique number: 52900).
